5 AI Tools that Impact Teaching & Learning

Eduaide.AI

AI Assisted Lesson Development

Get ready to have your mind blown! For any teacher that has ever doubted the use of AI in education, this one single application can quickly change your mind.

This one single tool can create lesson plans, anchor charts, engagement activities, leveled questioning, worksheets, student friendly objectives, and so much more in mere seconds. You just give it minimal information and let it do its magic. Let's check it out!

Lesson, Development, Tiered Student Support, Engagement Activities, and MORE!

Magic Tools through Magic School AI is a phenomenal tool that can help develop lesson plans, rubrics, differentiated reading summaries, professional emails, letters of recommendations, engaging learning activities and so much more. Don't know what you want it for? Use the Raina Chatbot to ask questions and find out what all it can offer. This tool is great for providing differentiated student support and saving time on best servicing all of your students!

Spark your students' curiosity!

Curipod is an AI tool that looks more kid friendly and less robotic. Curipod is a great tool to create student friendly content that instantly sparks curiosity and engages your students. The best part? The content can be created in seconds. The program offers a variety of options for creating presentations with all levels of learning involved. From exit tickets to art integration to schema building, Curipod has it all!

Gamma

AI Tool that Creates!

Gamma is an AI tool that will create beautiful documents, websites, or presentations in seconds. You just simply give it a topic and it creates stunning projects in seconds. You can put in as much or as little information as you would like and the program will generate information about the topic. With any AI program, please remember to fact check the information before claiming it as valid.

TeacherBot

Experiencing Magic for Teachers!

TeacherBot is a European-based tool that leans more towards aiding in reading/language arts. The tool will support other subjects, but as an RLA teacher, it provides writing exemplars, inference statements over tests, higher-level questioning and more. One neat component of the program is the ability to differentiate anything it creates by simplifying the content or making it more complex. While not as aesthetically pleasing as some of the other programs, TeacherBot is very easy to use and can prove itself to be very useful and time saving.
